EQ Offers Conversion Rear Main Seal Holders for 1986 to present Chevy's
Enables engine rebuilders to install a 2-piece seal crankshaft in a 1-piece seal design

(LAS VEGAS, NV) – EngineQuest® (EQ®), the leader in hard-to-find new and used performance and replacement engine parts, has introduced new conversion rear main seal holders for 1986 to present Chevrolet engines in V6 262 CID and V8 small block applications. The holders enable engine rebuilders to install a two-piece seal design crankshaft in a one-piece seal design application.

Featuring billet aluminum construction, the conversion rear main seal holders are precision CNC machined. The products are available in either an early style oil pan (EQ product #RSH349) or a late style oil pan (EQ product #RSH350) design. Locator dowels are included with the holders to prevent rear main seal leaks. EQ offers an optional alignment tool to help complete the installation (EQ product #AT350).

For more information or technical assistance, phone (800) 426-8771, or visit www.eqcylinderheads.com.

About EngineQuest (EQ)

EngineQuest (EQ) is the engine parts division of AAEQ Manufacturers and Recyclers. EQ's product line includes new, remanufactured and reclaimed engine parts. EQ sources its cores from its sister company, AA Midwest, which maintains a huge inventory of over 150,000 engines, transmissions and internal parts cores. EQ specializes in manufacturing parts that either make one automotive core work in another application or replace a hard to find or hard to salvage part.

EQ continues to offer new products to help the engine builder solve their manufacturing challenges, including: exhaust manifolds (new and reclaimed), timing covers (largest single line available), harmonic balancers, head bolt sets, crankshafts, stock replacement and performance cylinder heads. EQ parts are available from six national warehouses located in Chicago, Ill.; Las Vegas, Nev.; Spokane, Wash.; Long Island, N.Y.; Atlanta, Ga. and Dallas, Texas.
